

Say goodbye to yesterday's hassles.

It's time to shift to a better technology experience.

Applications and data protection by enterprise-level security technologies

- Our best-in-class services and practice brings a layered approach to security that's second to none.
- We eliminate risks with a locked-down approach to your network, resources and digital data.
- Redundant, enterprise-grade security appliances and auditable security solution locks down and controls all aspects of your IT Framework. Combined with 24 hour security monitoring.

Click IT managed services brings together a secure, fully monitored and managed, suite of solutions where businesses and their associates can trust in the security of their own systems. We ensure that you can focus on what you do best in running your business. From firewalls to Managed Antivirus, we ensure you are safe!

Automated backup, disaster prevention and business continuity

- Back-end monitoring and managed system updates maintains business continuity with less downtime and disruptions.
- Your business data is safe with Click IT's best-in-class redundancy; firewalls, anti-virus, security monitoring, and back-ups, with your data security our top priority.

Your Local IT Department

The Best Data Protection Available, Guaranteed

Equipped with our Hardware Firewall

Our complete Click IT Secure solution fully protects your business or home from ransomware, cybercriminals, and crime-ware.

Coupled with our Certified IT Staff

Self-administration is longer required. Click IT's staff handles all monitoring, maintenance, proactive troubleshooting, predictive failures and replacement of hardware before a failure occurs.

Be Available Everywhere

- One platform assures a consistent experience regardless of device.
- No matter where your staff connects, you receive highly secure connectivity from any network.
- Session roaming lets you pick up where you left off.

Updates and changes are easily published to all users simultaneously

- Have all users working on the same versions of software.
- Relax in knowing updates are being installed proactively.
- Enjoy being relieved of all the management of complex IT issues.
